

Androscoggin Head Start Receives Donation from Central Maine Credit Union

Central Maine Federal Credit Union has donated \$500 towards Androscoggin Head Start's Health and Nutrition program and also new books donated through the Credit Union's "Books for Kids Program" which donates new books annually to Androscoggin County schools. Head Start is a program for children and their families, providing pre-school and child care services, education, nutrition and support. Their programs emphasize physical, cognitive, social-emotional and educational development. Children receive medical and dental screenings and both child and family benefit from learning about proper nutrition.
